12. CONFIDENTIALITY AND SECURITY:

The Company does not own the safety of any information of clients shared with third parties that may be linked to or uses the services of the company but are unaffiliated. However, it may be linked to third-party websites, online services or mobile application and/or contain advertisements from third party that are unaffiliated with the services provided by the Company. Further stated that;

- No guarantee is provided regarding any such third parties and owns no liability for any loss or damage cause by such third party websites, services or application.
- No endorsement for any inclusion of link towards third-party website, service or application.
- No guarantee for the safety and privacy of data if clients shared with any third party
- Any data collected by third-party is not covered by this Policy
- No responsibility for the content or privacy, security practices and policies of any third party including other websites, services or applications linked from the services of the Company.

The Company aims to protect personal and financial information through a system of organizational and technical security measures, The Company shall strictly follow and implement all protocols and will take all necessary possible measures for confidentiality and security of data retained for different purposes. Despite all efforts to implement appropriate reasonable technical and organizational security measures and safeguard to secure data, no electronic transmission over the internet or information storage technology (database) can be guaranteed to be 100% secure, so hackers, cybercriminals are not promised or guaranteed. However, the Company is committed to use the best of all available resources to protect personal and financial information, transmission of data to and from the services of the company at the risk of the clients. On part of the users/clients, the Company expects to access the services within a secure and safe environment. Some of measures are summarized hereunder;

Usage of Artificial Intelligence and Machine Learning tools; The Company is well aware of the risks related with adoption of modern/latest tools & technology used in trading and determined to the security and confidentiality of the data received and/or obtained from its clients through multiple sources from time to time. In case of using artificial intelligence and machine learning tools, the Company takes the responsibility of security, confidentiality, integrity of its client's data and ensures compliance governing laws for the time being enforced.

Security measures; In order to realize the sensitivity to protect the confidentiality, integrity, resilience and availability of personal and financial information of clients, the Company has designed and put in place technical, physical, organizational and administrative security measures to prevent the accidental or unlawful destruction of data, loss, unauthorized alteration, unauthorized disclosure of, or unauthorized access to, personal information transmitted, stored, or otherwise processed. The personal data is processed in an encrypted database on computers and other devices.

PRIVACY POLICY

Limited access to data; The Company restricts and limits access to the Client's data and other information including transactions to the irrelevant employee, agents and third parties who doesn't need to know such type of information. The Company is committed and strictly follows to protect the personal and financial data including transactions against unlawful, unauthorized access and leakage of secret data. Any violation by an employee, in terms of this privacy policy, shall be subject to a disciplinary action. The Company has put in place zero tolerance policy in respect of any lapse in managing data resulting any accidental loss or damage of data even proper agreements are executed to ensure fully protection of data when third party service providers are engaged. The Company conduct due diligence of third parties prior to transfer personal data after assurance of appropriate security measures are put in place.

Login ID and Password; The information submitted while creating Demat Account on the Company's website, the clients are required to create password with due responsibility to maintain its confidentiality to avoid for any unauthorized access to or use of account. As the password and login ID are unique, and passwords are hashed even not readable by the employee. In case of forget password, the Company shall send link to set a new password by the client/user himself as the password cannot be retrieve by the Company. Under a circumstances where the client suspects the usage of unauthorized access to password or account then communicate the same to the Company immediately. The Company considers the responsibility of the clients to maintain the security of login details, any linked email address, personal computer or device on which the account is accessible e.g., screen locking, password protection, change password periodically etc.

Further stated that in a scenario where the Company needs to transfers the clients data internationally to a service provider or business partner located in a different origin country then the Company shall ensure additional safeguards to the client's personal and financial information under the legitimate agreements in accordance with the legislation of the country where data is being transferred. The Company considers the consent of its clients to transfer, storage and processing of personal and financial information to another origin of country.

Role of Client in data security; it is a great matter of concern that the action done by the users influence significantly the safety of data. The Clients are advised to refrain disclosing the chosen password to access specific website and services. In case confidentiality is not ensured on part of client, there is strong possibility the unauthorized access of your account and thereon leakage of personal and financial information. The clients should exercise caution when publicly sharing information on website or via the services. Remember, the Company is unable to get control the subsequent uses of the data divulge especially in public domains, which may be accessible to the user of any website or services.

Inherent Online Risks; the clients are warned the risks of leakage of secrecy of the data transmitted at online platforms at their own discretion for which the Company is not responsible and its inability to vouch for absolute security during transmission to its website or through its services on the following grounds:

- Internet offers unparalleled convenience, it is not entirely invulnerable

PRIVACY POLICY

- Regardless of relentless efforts of the Company, no guarantee to shield your personal data as per industry benchmark and legal provisions
- The Company disclaims liability for third-party breaches of the privacy settings or protective features on the website or within the services.

Data disseminated at Social Media Platform; Furthermore, the information shared by clients on Facebook, other social media platforms or for webinar event registration, it deems to be considered that the clients by default granting permission to such operators of social media platforms to share certain profile information with the social media account operators as the Company is also operating social media accounts hence may process the information shared by the clients. In this way, the Company is indirectly for granted allowed to process and use the client's data where the necessity arises.

Security technology and protocol; the company utilizes state-of-the-art industry standard encryption protocols and other methods to protect the personal and financial information against unintentional loss, unauthorized access, modification and unsolicited disclosure.

All data shared by the clients, encompassing personal and financial information, resides on fortified servers protected by robust firewalls. Whereas, sensitive details vis-à-vis payment transactions, trade details and clients lists are encrypted, leveraging SSL (Secure Sockets Layers) technology (succeeded by TLS (Transport Layer Security), more secure version of protocol) or other leading encryption standards.

It is pertinent to mention that firewalls and other security technologies are used to protect network and systems from external attacks and take industry standard steps to back up and protect the client's data.

Device usage; while using a shared or own device in a public place, either offline or on public WiFi, entering or receiving information may be a dangerous of being captured. To protect the data following precautionary measures must be taken:

- Avoid sending or receiving private information unless a secure webpage is accessible, preferably, use a secure, encrypted Virtual Private Network (VPN)
- Always use public WiFi with assurance of effective and updated antivirus/antispyware software and firewall
- Don't leave device unattended
- Use the browser tools to delete files and cookies and clear browsing history
- Always log-out of account-based websites at the end of session
- Avoid saving login credentials on a shared device
- In case of loss of login details, stolen, forget or disclosed to third parties or to an unauthorized person then contact the Company immediately to notify the same at; hello0@rvspk.com

13. CLIENT'S OBLIGATIONS

The Company believes the users are expected to maintain a respectful and secure environment while accessing or using the website or services by committing the following conditions:

- **Protect Security Features:**

Avoid tampering with or bypassing the security features of the Website or Services. While using the services of the Company, it is expected the users respect the integrity and functionality of our platforms

- **Accuracy of Information:**
